Pest Control Notice

Pest control is completed the second week of each month on Wednesdays and Thursdays. You are not required to be there.

If you are having a bug problem in your unit you need to call the office and advise them of the problem. This way we can tell the exterminators to do extra work spraying in your unit. If they need to spray inside your cabinets or closets you will need to empty them before they get there.

Be sure to clean your stoves, (under burners also) refrigerators and floors. Take your trash out on a regular basis so it does not pile up and attract bugs.
